Annular Solar Eclipse on 10 June 2021

Mundane Predictions for the World

By R.S.Maniam

On 10 Jun 2021, the world will experience the second eclipse of 2021, which is Solar, after the Lunar eclipse on 26 May 2021. The second eclipse of the year will confine to the North Pole. It is called Rahu Grahasta Surya Graha, in which the eclipse caused by Northern Lunar Node, the Dragon head.

Visibility of the Solar eclipse

This solar eclipse, according to the datetime.com is classified as Annular Solar eclipse. This will be visible as Annular and also partial in certain parts of the globe. The Annular phase of this Solar eclipse is visible from parts of Russia, Greenland, and northern Canada. Weather permitting, those in Northern Asia, Europe, and the United States will see a partial eclipse.

Eclipse time

The Solar eclipse will start at 8:12(UT) and will end at 13:11(UT), The maximum eclipse will occur at 10:41(UT). According to the skylive, the duration of Annular eclipse will last roughly 3hrs. This Annular solar eclipse comes under Saros cycle 147. A similar Ascending Node eclipse has happened, when Rahu was transiting at 5°37' in Taurus on 31 May 2003, in the constellation of Rohini (2nd pada), where total amavasya fell at 15°27'. However, the Solar eclipse on 10 June 2021 will occur in the constellation of Mrigasira (1st pada) at 25°39' Taurus.

Astrological findings

- ❑ The Annular Solar eclipse occurs, as Rahu & Ketu return to natal position of India's Independence chart. (Taurus-Scorpio axis).
- ❑ Mars crosses India's Natal Moon in Cancer, aspected by the 7th house transit of Saturn (Kantaka Shani): tendencies to cause mishaps, aggressive acts, demonstration and Natural disasters. Flash floods, border conflicts, public sorrows. Transit Mars will cross Moon, Sun, Mercury, Saturn and Venus in natal chart.
- ❑ Five planets will occupy Earthy signs. Taurus and Capricorn.
- ❑ The Annular Solar eclipse is significant, as it occurs during the time of Mars-Saturn opposition, along Cancer and Capricorn axis. Mars has become debilitated.
- ❑ The eclipse occurs in the earthquake-prone sign, (Reference: Alan Leo, Taurus-Scorpio axis).
- ❑ There is a harmonious aspect between Jupiter and Venus. Jupiter's 5th aspect falls on Venus in the sign of Gemini. Far more impressive is that both planets occupy the constellation of Rahu, which depicts a remote distance correspondence.

- ❑ The communication planet Mercury is in close conjunction with Sun and Moon. Mercury falls in the Navamsa of Leo, with Mars.
- ❑ Venus and Mercury form parivarthana and exchange signs between Taurus and Gemini. Good sign for domestic financial stability.
- ❑ The Annular Solar eclipse occurs, when Moon is in its exaltation point, and the Rahu-Ketu axis is also considered 'exalted axis'.

Solar eclipse and the constellation of Mrigasira

The constellation of Mrigasira is considered as star of exploration or research. It depicts people with vast learning, especially those in scientific exploration. This includes people with mystical outlook too. As discussed by Uma Pada sen, the constellation, as elicited in Rigveda, is ruled by Prajapathi, the Creator of the Universe, and Kalapurusha. New scientific discoveries about the universe will be expounded. According to Vashisht Vaid, saint Agastya has described the constellation of Mrigasira as "Especially among them is the 'Mrigasirsha [Orion Constellation], vitally existing as being the 'Head Source' of many 'vital cosmic forces'". Thus, the Solar eclipse in this nodal point should be

invisible in india

Both Lunar (26 May) and Solar (10 June) eclipses will impact the development in India. The Lunar eclipse occurs in the Moon sign of Prime Minister Narendra Modi. The Solar eclipse occurs in the Taurus ascendant of Indian Independence chart. The Rahu-Ketu axis along Taurus-Scorpio, and transit Ketu with Moon and Mars of the Prime Minister will make him firm, consistent, and withstand the turbulence caused by the political scenario of India. The Space exploration will grow to be a highly advanced technology. The only hurdles during this period is the Saturn-Mars opposition, that happens concurrently with the eclipse.

considered spiritually significant, and may guide the humanity to further enhance the endeavour to explore the universe and reach the frontiers. Thus, Space industry will be the next main phase of development.

Impact on India

		Rahu 6°37' Moon 26°32' Sun 25°37' Merc (R) 26°32'	Venus 15°28'			Rahu 05°44' Asc 07°46'	Mars 07°27'
Jup 07°51'	Solar Eclipse 10 June 2021 16:13 hrs Delhi, India		Mars 05°09'		Indian Independence Chart 15th August 1947 00:00 hrs New Delhi		Moon 03°58' Merc 13°42' Sat 20°20' Venus 22°33' Sun 27°59'
Sat (R) 19°06'	RASI CHART				RASI CHART		
	Ketu 16°37'	Asc 16°57'			Ketu 05°44'	Jup 25°52'	

Transit Rahu at the time of Solar eclipse on 10 June 2021 is at 16°37' in the constellation of Rohini (2nd pada). While in the Independent chart, Rahu is posited in the sign of Taurus too, at 5°44' in the constellation of Kritikka (3rd pada) and is very close to the rising degree of India at 7°46'. Rahu in Taurus will have great impact on India. Rahu-Ketu axis along the Taurus and Scorpio mode is powerful as these are exalted points for the Ascending and Descending nodes.

Historical Evidences

- When Mars (4:51 Taurus) transited close to this point during 10 May 1857, the historical event of Indian Mutiny started.
- Similarly, the Black hole Calcutta happened on 20 June 1756, when Mars was transiting the navamsa of Taurus.
- Even the death of Mahatma Ghanthi happened on 30 Jan. 1948, when Sun and Ketu were in Taurus Navamsa and Rahu in Scorpio navamsa.
- The first Indian Satellite Aryabhata was launched

on 19 April 1975, When Rahu-Ketu axis was In Scorpio-Taurus axis. Ketu was just exactly on the rising Lagna of Inida, with Venus in close conjunction.

□ Emergency was imposed by the Indira Gandhi Government on 25 June 1975, with Ketu and Mercury in Taurus, Saturn in Navamsa of Taurus.

□ Rajiv Gandhi was assassinated on 21 May 1991, when Sun(6:20) in Taurus was very close to natal Rahu of India at 5:44 in Taurus. Ketu was in the Navamsa of Taurus, which had an influence over India

□ From 9 August 2020, the farmers' demonstration in India has been continuing for more than six months. Transit Rahu-Ketu axis is in Taurus-Scorpio. Taurus, an Earthy sign, relates to land and farmers' revolt.

Moon Dasa and India

Currently, based on the India independence chart, the Nation is undergoing Moon dasa, till Sept 2025. The operating period is Moon-Saturn from 3 Dec.2019 to 2 July 2021. Bhukti lord Saturn is in the 3rd house of the Indian independence Chart as the 9&10th lord, forming five planets stellium in the 3rd house, associated with Yoga Karaka Mercury (2 & 5th lord). Fourth lord Sun augurs the stellium of planets in the 3rd house. Dasa lord Moon is in the ecliptic point.

The current Solar eclipse occurs in the 11th house from the natal Moon of India, in Cancer. The 11th house transit of a planet is normally considered to bring gain, success, good foreign relations, etc.

Past Events

Solar eclipses: Sun & Rahu transiting Taurus

1. On 31 May 1946, a Solar eclipse hapopened at 15°43' Taurus, Rahu at 27°41' of Rohini (2nd pada), on 10 May 1946, Nehru was elected leader of the Congress party.
2. 20 May 1947: Sun at 5°36', Krittika 3rd pada, Rahu at 9°26'. On 15 August 1947, majority Hindu

invisible in india

Nation of India, and Muslim Pakistan were created by partition of the sub-continent.

3. On 20 May 1965, Sun-15°52', Rohini (2nd pada); Rahu-20°27'. On 29 May – 1965 Dhanbad Coal mine disaster, which killed 274. The issue of Indo-Pakistan war was also prevailing.

4. 20 May 1966, Sun at 5°33' in Kritika (3rd pada); Rahu at 1°55'. Shiva Sena was founded on 19 June 1966. After three months, Eighteenth Amendment of the Constitution of India was implemented.

5. 30 May 1984, Sun at 15°49', Rahu at 12°58', eclipse at Rohini (2nd pada). On 1st June, the Indian Government began Operation Blue Star. On 4th June, Indian troops stormed the Golden Temple at Amritsar. On 31 Oct. 1984, assassination of Indira Gandhi happened.

6. 11 June 2002, Sun at 26°02' in Mrigasira 1st pada. Rahu at 23°59', Conflict with militant Kashmir base; 34 killed on 14 May 2002. Abdul Kalam was appointed as the President on 15 July 2002.

Space Exploration Technologies Corp. (SpaceX)

Space X was formed on 6 May 2002. A planetary pooling in the sign of Taurus, shows the cosmic

	Sun 22°03'	Mercr 2°36'	Jup 17°58'
		Venus 19°22'	
		Sat 20°17'	
		Mars 21°16'	
		Rahu 24°28'	
Moon 18°08'	Space X 06 May 2002 12:00 hrs Washington DC		Asc 16°03'
RASI CHART			
	Ketu 24°28'		

effulgence of the Orion Belt, which has fascinated the humanity for a long time.

The recent developments in Aerospace engineering and space exploration carried out by Space X programme has captured the world attention.

The above Foundation

chart of Space X programme shows a stellium of five planets in the sign of Taurus. An interesting point is the Rahu-Ketu axis along Taurus and Scorpio. During 10 June 2021 Solar eclipse, the transit of Sun will touch this nodal point of Rahu. There will be a significant development in the Space X programme.

Mr. Elon Musk (Founder of SpaceX; DOB: 28 June 1971, Peritoria) has Saturn and Venus in Taurus. Venus is posited around 26° in Taurus and the Solar eclipse happened at 25° in Taurus, in close proximity to Elon Musk's Venus. It is a good point to note that in the Space X formation chart, Venus and Saturn are together in Taurus too, where the Solar eclipse occurs.

Solar eclipse during Saturn and Mars opposition

Mars moves to the sign of Cancer on 2 June 2021, and remains in opposition to Saturn in Capricorn. The

Sun will move to Gemini on 15 June 2021. Mars would have progressed about 08° in Cancer, into the constellation of Pushya (2nd pada). Infact, the exact opposition of Mars and Saturn will fall in the post Solar eclipse period till 20 July 2021.

As per the Indian Independence chart, the Saturn-Mars opposition will occur involving Janma Rasi, while the Solar eclipse will occur in India's janma lagna. It may have an impact on Mr. Narendra Modi's leadership. Mars (in debilitation) will cross five natal planets in Indis's Moon sign. This calls for extra security for the leadership of the country. Sun will join Mars on 16 July 2021, adding fuel to the already disturbed period. This period will promote tension around the globe, aggression, riots, violence, uncompromising leadership, natural disasters such as earthquake, tornados, landslides, heavy floods. Volcanic eruptions, Chemical explosion hazards are likely.

As pointed out by E.S. Kennedy, Mars, is the cause of wars, bondage, slavery, insurrection of many people, and anger of the chiefs, especially within people of the same race, and that which afflicts some of the people with anger, ignominy, transgressions, the abandoning of religious law, conflagration, plundering, and killing.

Preceding Lunar eclipse on 26 May 2021

The 10 June 2021 Solar eclipse will be preceded by a Total Lunar eclipse on 26 May 2021. This eclipse will only be viewed, as partial eclipse in few places in Inida. This Lunar eclipse is important, as it falls along Taurus and Scorpio axis, and it is the Moon sign of the Prime Minister Mr. Narendra Modi.

The two eclipses will create important milestones on India and its leadership. The positive element about the eclipse is that they occur in 5th and 11th place from India's Natal Moon. New ventures, new settlements are possible. As Mercury and Mars receive harmonious 5th aspect of Jupiter, there will be good development in Information Technology and Communication field, especially software and computer-related fields. Matters related to Media freedom need to be kept under vigilance.
